

UiPath Orchestrator Accessibility Conformance Report WCAG Edition

(Based on VPAT® Version 2.4)

Name of Product/Version: UiPath Orchestrator 2022.10.6

Report Date: May 31, 2023

Product Description: UiPath Orchestrator is a web application that enables users to provision, deploy, trigger, monitor, measure, and track the work of attended and unattended robots.

Contact Information: Contact sales: <https://www.uipath.com/company/contact-us>

Notes: Specific user scenarios were tested to ensure critical user paths were included in the VPAT. All application content was not tested, but rather a crucial sampling of content was used for test cases. Functions tested include:

Evaluation Methods Used: New Edition’s Software Test Process for WCAG 2.1 AAA was used (based on Trusted Tester v5, WCAG 2.0 AAA, WCAG 2.1 A-AAA, and Section 508 Software testing). The following testing tools were used on a Windows 10 desktop: Accessibility Insights for Windows v1.1, Color Contrast Analyzer, NVDA v2020.1, and external keyboard.

Testing was performed by certified Trusted Testers (v5) from New Editions Consulting, Inc.

Applicable Standards/Guidelines

This report covers the degree of conformance for the following accessibility standard/guidelines:

Standard/Guideline	Included In Report
Web Content Accessibility Guidelines 2.0	Level A (Yes) Level AA (Yes) Level AAA (No)
Web Content Accessibility Guidelines 2.1	Level A (Yes) Level AA (Yes) Level AAA (No)

Terms

The terms used in the Conformance Level information are defined as follows:

- **Supports:** The functionality of the product has at least one method that meets the criterion without known defects or meets with equivalent facilitation.
- **Partially Supports:** Some functionality of the product does not meet the criterion.
- **Does Not Support:** The majority of product functionality does not meet the criterion.
- **Not Applicable:** The criterion is not relevant to the product.
- **Not Evaluated:** The product has not been evaluated against the criterion. This can be used only in WCAG 2.0 Level AAA.

WCAG 2.x Report

Notes: When reporting on conformance with the WCAG 2.x Success Criteria, they are scoped for full pages, complete processes, and accessibility-supported ways of using technology as documented in the WCAG 2.0 Conformance Requirements.

Table 1: Success Criteria, Level A

Notes:

Criteria	Conformance Level	Remarks and Explanations
1.1.1 Non-text Content (Level A)	Web: Supports	Text alternatives are provided for all non-text content.
1.2.1 Audio-only and Video-only (Prerecorded) (Level A)	Web: Not Applicable	The criterion is not relevant to the product.
1.2.2 Captions (Prerecorded) (Level A)	Web: Not Applicable	The criterion is not relevant to the product.
1.2.3 Audio Description or Media Alternative (Prerecorded) (Level A)	Web: Not Applicable	The criterion is not relevant to the product.
1.3.1 Info and Relationships (Level A)	Web: Supports	Information, structure, and relationships conveyed through presentation can be programmatically determined or are available in text.
1.3.2 Meaningful Sequence (Level A)	Web: Supports	When the sequence in which content is presented affects its meaning, a correct reading sequence can be programmatically determined.
1.3.3 Sensory Characteristics (Level A)	Web: Not Applicable	The criterion is not relevant to the product.
1.4.1 Use of Color (Level A)	Web: Supports	Color is not used as the only visual means of conveying information, indicating an action, prompting a response, or distinguishing a visual element.
1.4.2 Audio Control (Level A)	Web: Not Applicable	The criterion is not relevant to the product.
2.1.1 Keyboard (Level A)	Web: Supports	All functionality is available using solely a keyboard.
2.1.2 No Keyboard Trap (Level A)	Web: Supports	There are no keyboard traps.
2.1.4 Character Key Shortcuts (Level A 2.1 only)	Web: Supports	Keyboard shortcuts implemented in content using only letter (including upper- and lower-case letters), punctuation, number, or symbol characters allow the shortcuts to be turned off, remapped, or are active only on focus.
2.2.1 Timing Adjustable (Level A)	Web: Does Not Support	The application times out without warning. A user is not able to turn off, adjust, or extend the time limit.
2.2.2 Pause, Stop, Hide (Level A)	Web: Not Applicable	The criterion is not relevant to the product.
2.3.1 Three Flashes or Below Threshold (Level A)	Web: Not Applicable	The criterion is not relevant to the product.
2.4.1 Bypass Blocks (Level A)	Web: Supports	A mechanism is available to bypass blocks of content that are repeated on multiple web pages.
2.4.2 Page Titled (Level A)	Web: Supports	Web pages have titles that describe topic or purpose.
2.4.3 Focus Order (Level A)	Web: Supports	Focusable components receive focus in an order that preserves meaning and operability.
2.4.4 Link Purpose (In Context) (Level A)	Web: Supports	The purpose of each link can be determined from the link text alone or from the link text together with its programmatically determined link context.
2.5.1 Pointer Gestures (Level A 2.1 only)	Web: Not Applicable	The criterion is not relevant to the product.
2.5.2 Pointer Cancellation (Level A 2.1 only)	Web: Supports	All functionality that can be operated using a single pointer either has no down event, the ability to abort or undo, up reversal, or is essential.

Criteria	Conformance Level	Remarks and Explanations
2.5.3 Label in Name (Level A 2.1 only)	Web: Supports	For user interface components with labels that include text or images of text, the name contains the text that is presented visually.
2.5.4 Motion Actuation (Level A 2.1 only)	Web: Not Applicable	The criterion is not relevant to the product.
3.1.1 Language of Page (Level A)	Web: Supports	The default human language of each web page can be programmatically determined.
3.2.1 On Focus (Level A)	Web: Supports	When any component receives focus, it does not initiate a change of context.
3.2.2 On Input (Level A)	Web: Supports	Changing the setting of any user interface component does not automatically cause a change of context unless the user has been advised of the behavior before using the component.
3.3.1 Error Identification (Level A)	Web: Supports	If an input error is automatically detected, the item that is in error is identified and the error is described to the user in text.
3.3.2 Labels or Instructions (Level A)	Web: Supports	Labels or instructions are provided when content requires user input.
4.1.1 Parsing (Level A)	Web: Supports	In content implemented using markup languages, elements have complete start and end tags, elements are nested according to their specifications, elements do not contain duplicate attributes, and any IDs are unique, except where the specifications allow these features.
4.1.2 Name, Role, Value (Level A)	Web: Supports	For all user interface components (including but not limited to form elements, links and components generated by scripts), the name and role can be programmatically determined; states, properties, and values that can be set by the user can be programmatically set; and notification of changes to these items is available to user agents, including assistive technologies.

Table 2: Success Criteria, Level AA

Notes:

Criteria	Conformance Level	Remarks and Explanations
1.2.4 Captions (Live) (Level AA)	Web: Not Applicable	The criterion is not relevant to the product.
1.2.5 Audio Description (Prerecorded) (Level AA)	Web: Not Applicable	The criterion is not relevant to the product.
1.3.4 Orientation (Level AA 2.1 only)	Web: Supports	Content does not restrict its view and operation to a single display orientation, such as portrait or landscape, unless a specific display orientation is essential.
1.3.5 Identify Input Purpose (Level AA 2.1 only)	Web: Supports	The purpose of each input field collecting information about the user can be programmatically determined when the input field serves a purpose identified in the Input Purposes for user interface components section; and the content is implemented using technologies with support for identifying the expected meaning for form input data.
1.4.3 Contrast (Minimum) (Level AA)	Web: Supports	The visual presentation of text and images of text has a contrast ratio of at least 4.5:1.
1.4.4 Resize text (Level AA)	Web: Supports	All text can be resized using the browser functionality up to 200 percent without loss of content or functionality.
1.4.5 Images of Text (Level AA)	Web: Supports	Text is used to convey information rather than images of text except for when a particular presentation of text is essential.
1.4.10 Reflow (Level AA 2.1 only)	Web: Does Not Supports	Content does not reflow without loss of functionality or content.
1.4.11 Non-text Contrast (Level AA 2.1 only)	Web: Supports	The visual presentation of user interface component and graphical objects have a contrast ratio of at least 3:1 against adjacent color(s).
1.4.12 Text Spacing (Level AA 2.1 only)	Web: Supports	Text spacing does not result in loss of content or functionality.
1.4.13 Content on Hover or Focus (Level AA 2.1 only)	Web: Does Not Supports	Tooltips are not hoverable, but they are dismissible.
2.4.5 Multiple Ways (Level AA)	Web: Supports	More than one way is available to locate a web page within a set of web pages except where the web Page is the result of, or a step in, a process.
2.4.6 Headings and Labels (Level AA)	Web: Supports	Headings and labels describe a topic or purpose.
2.4.7 Focus Visible (Level AA)	Web: Supports	Any keyboard operable user interface has a mode of operation where the keyboard focus indicator is visible.
3.1.2 Language of Parts (Level AA)	Web: Partially Supports	Globally, the language of parts of a page that differ from main page language do not have lang attributes. Note: There is no technical way to control or determine what values are inputted in the fields by various users, therefore there is no method available to make such language parts programmatically determinable.
3.2.3 Consistent Navigation (Level AA)	Web: Supports	Navigational mechanisms that are repeated on multiple web pages within a set of web pages occur in the same relative order each time they are repeated, unless a change is initiated by the user.

Criteria	Conformance Level	Remarks and Explanations
3.2.4 Consistent Identification (Level AA)	Web: Supports	Components that have the same functionality within a set of web pages are identified consistently.
3.3.3 Error Suggestion (Level AA)	Web: Supports	If an input error is automatically detected and suggestions for correction are known, then the suggestions are provided to the user, unless it would jeopardize the security or purpose of the content.
3.3.4 Error Prevention (Legal, Financial, Data) (Level AA)	Web: Not Applicable	The criterion is not relevant to the product.
4.1.3 Status Messages (Level AA 2.1 only)	Web: Supports	In content implemented using markup languages, status messages can be programmatically determined through role or properties such that they can be presented to the user by assistive technologies without receiving focus.

Table 3: Success Criteria, Level AAA

Notes: The product has not been evaluated for WCAG 2.1 Level AAA conformance.
