To ensure the data is properly communicated, all visual tables should be programmatic (to ensure the table headers are properly communicated with each piece of data). • The radio buttons are not associated with the checkbox, such as "Enforce Analyzer before Publish", so a user may not understand the purpose of the radio button. Accessible names must provide the full purpose and meaning of the element. • Radio buttons are not associated with their instructions; instead they just say yes or no. The radio button's accessible name/description should also communicate "Allow users to send feedback, required", for example.
